

Your Chance to have Australia's Premier Horse-Human Relationship Expert to be your personal coach!

We know the challenges of trying to succeed when you are on your own; being unsure of what you are doing or whether you are doing it right, especially if your horse is not responding as you expect.

We've been searching for answers and have noticed that the people who succeed in our program all do the following:

- Attend courses regularly
- Contact us with questions via phone or email when they have a question or challenge or even send us videos
- Have our DVD's and paddock pack and use them
- Use a "lesson plan" to ensure they are practicing "deliberately"

We have also been studying success in other areas, both sporting and business.

The one common denominator that both areas have is a **Coach**. The growth in business coaching over the last 20 years has been amazing (guess what, we have one).

A Coach is someone who is experienced and objective that can help you identify areas for improvement and focus your efforts in the most effective way; someone who will provide you with advice and support and fast track your success.

So many people know they should go to the Gym, though only a handful go there regularly and do an Effective program. Many people NEED a Personal Trainer to keep them on the 'straight & narrow', otherwise they would find every excuse not to do the Gym 'today'. Guess what, Debbie goes to the Gym and has a Personal Trainer, otherwise she would not continue to go!
